DPA d:facto II microphone with wireless option

DPA microphones have announced the release of it's d:facto II vocal microphone. Designed as a high quality cabled vocal microphone to rival established high end vocal microphones like the Neumann KMS105, the second generation of the d:facto can be bought as an adaptor to be used with a range of wireless handheld transmitters, such as those made by Sennheiser, Shure and Sony.

Stage Research announce RF Scanner

Stage Research, makers of SFX, RF Guru and Show Builder, have announced their latest product, RF Scanner. Using external hardware (Lectrosonics VR, RF Explorer, and WiNRADiO 305 are compatible), the software will compile a survey of the RF environment, and can export the results as a .CSV file.

The software is available for \$39, then on a subscription basis thereafter, currently \$19pa. The software runs under Windows but will happily run under Parallels, VMWare, etc on a Mac.
